

Cost Saver for Corporate Business

Reduce the cost of telephone calls for your business with the EWC Business & Mobile Solution - a rapid and measurable means to enable lower call costs and protect investment together with minimal management and training time.

- Stand-alone or hosted Solutions
- Telephone Gateway for IP-PBX
- Compatible with all makes of PBX
- Integrated Call Management
- EWC Web based Billing Platform
- Secure and resilient architecture
- No requirement for capital investment

Lower costs - on calls to satellite offices, business contacts and regular telephone calls to local and international destinations, by both on-site and off-site personnel;

Protect your investment - the EWC Business Solution is easily integrated into your existing network and telephone systems infrastructure;

Reduce management and training costs - simple to implement, easy to operate, providing employees with a familiar telephone calling experience that requires no training.

Flexibility and Reliability

With EWC, savings are not limited to calls between regular telephones and mobiles. Simply by installing EWC Gateways at separate business locations you can benefit from un-metered calls, whether locally or worldwide, for a low fixed monthly charge.

The fully customisable Business Package supplied by EWC consists of:

EWC Billing Platform - hosted remotely, and accessible via secure servers, our billing platform enables full management and reporting of each and every call made via the system.

EWC Telephone Gateway Hardware - provided free of charge for installation at your site. Solutions range from a single-user IP telephone, to rack mounted equipment supporting the calling requirements of larger sized offices and organisations.

Installation Service - we can plan and manage the installation for your convenience.
