

Cost Saver for Corporate Business

Reduce the cost of calls to your business mobiles with the EWC Business Mobile Solution - a rapid and measurable means to enable lower call costs and protect investment together with minimal management and training time.

- Stand-alone or hosted Solutions
- GSM gateway for IP-PBX
- Compatible with all makes of PBX
- Integrated SMS gateway
- EWC Web based Billing Platform
- Secure and resilient architecture
- No requirement for capital investment

Lower costs - EWC solutions provide more economical mobile calls by benefiting from the various GSM tariffs available from different mobile operators. We recommend this scenario for businesses with a call volume of 1000 or more mobile minutes per month;

Protect your investment - the EWC Business Mobile Solution is easily integrated into your existing network and telephone systems infrastructure;

Reduce Management and training costs - simple to implement, easy to operate, providing employees with a familiar telephone calling experience that requires no training.

Sales: +44 (0)870 334 0289 or visit the web site at www.ewcoms.com

Scalability

The EWC solution is fully scalable
- from 4 to 64 GSM channels, supporting
all GSM standards.

The fully customisable Business Mobile package supplied by EWC consists of:

EWC Billing Platform - hosted remotely, and accessible via secure servers, our billing platform enables full management and reporting of each and every call made via the system.

EWC Telephone Gateway Hardware - provided free of charge for installation at a customer site. Solutions range from a single-user IP telephone, to rack mounted equipment supporting the calling requirements of larger sized offices and organisations.

EWC GSM Switch - contains multiple SIM cards which support connectivity for your mobile business users and is hosted remotely by EWC.

Installation Service - we can plan and manage the installation for your convenience.
